

EMLab P&K Launches Redesigned Website, Highlighting Ease in Navigation When Finding Laboratory Services

Environmental and IAQ professionals who visit EMLab P&K's new website will easily find the lab testing services that they need including mold, Legionella, asbestos, bacteria, USP 797, radon and more.

South San Francisco – [WEBWIRE](#) – Wednesday, February 21, 2018

EMLab P&K, a TestAmerica company and a leading commercial indoor air quality (IAQ) laboratory in North America, recently relaunched its redesigned company website, in order to make it easier for environmental professionals to find the laboratory services they need. The new website is easier to use and navigate, employs a modern, responsive design that is mobile-friendly, and highlights value-added benefits including MoldRANGE™ Local Climate reports, LabServe®, and EMLab P&K's proprietary QA system.

“We are excited to now present the redesigned EMLab P&K website to our clients and the general public,” said Dave Gallup, EMLab P&K's General Manager and Co-Founder. “Our website has been an excellent resource for many in this industry and we are happy to provide an easier to navigate site, highlighting our services and educational tools. As our company continues

“ Our website has been an excellent resource for many in this industry and we are happy to provide an easier to navigate site, highlighting our services and educational tools. As our company

to grow, we plan to continue investing in multiple areas that help our clients - including customer service, mobile apps, and technological advancements in the IAQ industry.”

Highlights from the redesigned website include:

- The “Find My Lab” feature - locating the nearest laboratory based on your location
- Laboratory services - ranging from Mold, *Legionella*, and Asbestos to USP 797, PCR testing, and Radon testing
- Tools - including LabServe®, Mobile Apps, and proprietary reports like the MoldRANGE™ Local Climate Report
- Resources - featuring Webinars, Fungal Library, COC’s, Sampling Guides, and Education
- Mission and Values that highlight EMLab P&K’s focus on health in the built environment

continues to grow, we plan to continue investing in multiple areas that help our clients - including customer service, mobile apps, and technological advancements in the IAQ industry.” - Dave Gallup, Co-Founder and General Manager

While the company’s previous website had all services listed, the newly improved site now provides a cleaner interface with a modern look, making it easy to find the necessary services and details. The new design also categorizes sample reports by type (e.g., PDF, XLS, CSV, RTF, TXT). In addition, [mold lab](#) services such as spore trap analysis have sub-categories for PDF’s to make it easier for mold investigators to choose the report that fits their needs.

About EMLab P&K

EMLab P&K, a TestAmerica company, is the leading commercial indoor air quality laboratory in North America with over 60 service and drop-off locations across the United States. EMLab P&K specializes in analyzing air and surface samples to identify mold, bacteria, asbestos and allergens. EMLab P&K also offers USP 797 testing, PCR testing, radon analysis, and materials testing. EMLab P&K has an extensive list of accreditations and certifications from leading organizations and government agencies including: AIHA-LAP, LLC, NVLAP, CA-ELAP, Texas DSHS and other state licensing and certification programs.
